

## *CANopen Conformance Test Suite order form*

The CANopen Conformance Test Suite, which is also used for the CANopen certification is available for any manufacturer of a CANopen device and for any user of CANopen devices. Anybody is able to check conformance of a CANopen device according to the standards and to prepare the CANopen device to pass the certification process. The CANopen Conformance Test Suite Version 2.0 is available at CAN in Automation. There is no CAN hardware offered by CAN in Automation. The price for the pure software tool is **1325,-Euro (1576,75 Euro incl. German VAT)**. Please consider system requirements! Test tool updates from older Versions to Version 2.0 are available at CiA for **450,-Euro (535,50 Euro incl. German VAT)**.

The CANopen Conformance Test Suite requires a CAN hardware interface installed on the PC, in order to access the CANopen devices to be tested. The internal access of the software to the CAN hardware interface is based on a well-defined interface called CANopen Testing Interface (COTI). A listing of companies that offer CAN hardware together with COTI is provided on our website: [www.can-cia.org](http://www.can-cia.org)
